Short support description	The Innovation Office is a first point of contact for providing orientation and support, especially for academic research groups, small and medium-sized enterprises and start-ups. We offer support for a wide range of topics, like general comprehension questions as well as specific questions about your individual project idea. We support in finding the right contact person, not only within the BfArM, but also outside of the BfArM, in case the concern is not within our area of responsibility. The BfArM also offers scientific advice on concrete study design aspects covering questions related to the pharmaceutical quality (including biological and biotechnological aspects), the assessment of medical devices, the design and conduct of non-clinical investigations and clinical trials of medicinal products and medical devices (including biostatistics).

This profile is part of the [Comprehensive Inventory \(CI\)](#) provided by the [STARS project](#).

Purpose of the CI is to assist European academic drug developers in finding support on regulatory affairs. The inventory lists various support services provided by national competent authorities, public actors and private entities.
